Malamulele, South Africa (Open to Relocation)

Languages: Xitsonga (native), English (native)

Assistant manager with 11+ years of experience in operational leadership, system coordination and translating complex business needs into technical solutions. Combining strong analytical skills with a deep understanding of IT infrastructure to provide proactive problem-solving in high-pressure environments.

AREAS OF EXPERTISE

- IT Operations & Infrastructure: Strategic management of network availability, Windows Server environments, and Active Directory administration.
- Service Management (ITIL): Incident resolution, technical support workflows, and aligning IT services with organizational goals and Batho Pele principles.
- Full-Stack Development: Designing and deploying scalable backend architectures and intuitive user interfaces.
- Data & Inventory Automation: Developing custom tracking systems and barcode integrations to optimize business data reconciliation.
- Technical Leadership: Cross-functional team training, vendor management, and budget oversight for technical operations.

TECHNICAL SKILLS

- AI & Modern Tools: Google Stitch, Google Antigravity AI, Git, and Render.
- Backend Languages: Node.js, TypeScript, Express, C#, Java, C++, PHP, JavaScript, and HTML5/CSS3.
- Databases: PostgreSQL (Neon), MySQL, Microsoft SQL Server, Oracle Database, and NoSQL.
- Systems & Networking: Windows Server (2019/2022), Active Directory (ADDS/GPO), Linux, WAN/LAN Networking, and Cloud Management.
- Support Tools: Zendesk, HESK Ticketing, and Advanced Microsoft Excel (Automated Formulas/Macros).

PROFESSIONAL EXPERIENCE

Assistant Manager & ITIL Coordinator | Mboni Restaurant | January 2015 – Present

- Administer and troubleshoot Point of Sale (POS) infrastructure, ensuring 99.9% uptime during peak operational hours.
- Leverage Google Stitch and AntigraVity AI to streamline internal technical documentation and automate support workflows.
- Managed Identity & Access via Active Directory, configuring user permissions and security groups for a staff of [Number].
- Engineered custom Excel-based inventory tracking systems with barcode integration, reducing data reconciliation errors by 30%.
- Supervised daily operations, including budget monitoring, cash flow balancing, and vendor relationship management.
- Trained and onboard staff on digital systems, improving software proficiency and ensuring compliance with service standards.

EDUCATION & PROFESSIONAL DEVELOPMENT

- Diploma in Information Technology (2025), University of South Africa.
- Grade 12 (National Senior Certificate).
- In Progress: ITIL 5 Certification Preparation.
- Continuous Learning: Backend Development curriculum via The Odin Project.
