PROFESSIONAL SUMMARY

IT operations specialist with 11 years managing infrastructure, service desks, and systems end-to-end. Operational leadership experience managing and training staff. Strong foundation in Software Development, expertise in solving business needs with custom made software. UNISA Information Technology graduate.

CORE COMPETENCIES

- ITDM & Service Governance: ITIL 5 Framework (Self-Study), Incident, Problem & Change Management, SLA Governance, Business Requirements Analysis.
- Systems Infrastructure: Windows Server 2019/2022, Active Directory Administration, GPO-enforced access controls, Identity & Access Management (IAM).
- Full-Stack Architecture: Node.js, TypeScript, React, Bootstrap 5, PostgreSQL relation modelling.
- Operational Leadership: Vendor & Business Management, Cross-function Staff training & Tech Onboarding.

TECHNICAL SKILLS

- ITSM: Zendesk, HESK, ITIL 5 Framework (Self-Study), Incident Management, Change Management, SLA Governance.
- Systems: Windows, Linux, IOS and Android operation system. Windows server 2019/2022, Active Directory (ADDS/GPO), Identity & Access Management, WAN/LAN, Cloud Infrastructure.
- Backend: Node.js, TypeScript, Express, REST APIs, Prisma ORM, C#, PHP, JAVA.
- Frontend: React, Bootstrap 5, HTML5, CSS3, JavaScript (ESM), EJS, Webpack.
- Databases: PostgreSQL, MySQL, Microsoft SQL Server, Oracle, NoSQL.
- Tooling: Git, Render, NPM, Jest, Advanced Microsoft Excel (Macros / Automation).

PROFESSIONAL EXPERIENCE

Mboni Restaurant — Assistant Manager & IT Operations Lead | Jan 2015 – Present

- Maintained 99.9% POS uptime across 11 years of peak trading by implementing proactive endpoint monitoring, management of Hola Club (Kazang), maintenance windows, and vendor SLA enforcement — zero revenue-impacting outages.
- Cut incident resolution time by 40% by designing ITIL-aligned triage workflows, priority matrices, and first-call-resolution targets tracked in Zendesk — reducing average ticket closure time measurably.
- Maintained zero unauthorized access incidents over 11 years — administered Active Directory for over 20 users across the 11 years, configure security groups, OU structures, and GPO-enforced access controls aligned to IAM best practice.
- Reduced stock reconciliation errors by 30% by engineering a barcode-integrated Excel inventory system with automated data validation, eliminating a fully manual reconciliation process.
- Engineered a Barcode/QR code [generator](#) — for creating custom codes for Digital Menus, track equipment & Wi-Fi access.
- Dropped new-staff support tickets by 33% after building and delivering digital onboarding programmes covering POS operation, IT security compliance, and business software — documented in an audit-ready knowledge base.
- Accelerated documentation turnaround by 50% by standardising ITIL-aligned incident records, change request templates, and SLA reporting — all audit-ready on the first draft.
- Secured zero unplanned budget overspend across 4 consecutive fiscal cycles — managed hardware procurement, outsourced vendor relationships, and capital expenditure against approved budgets.

Doctor Internet Café {Part-time / Freelance} — Technician | Mar 2024 – Present

- Deliver Tier 1 remote technical support via phone calls, guiding users and staff through real-time troubleshooting for operating system configuration conflicts, network connectivity faults, and mobile device issues.
- Execute Tier 2 on-site hardware and software escalations during scheduled off-hours, performing component-level diagnostic isolation, OS reinstalls, and system image redeployments for complex business and consumer hardware.

EDUCATION & CREDENTIALS

- Full-Stack JavaScript Development | The Odin Project | Completed: May 2026
 - Core Focus: Node.js, Express.js, React, CSS3, HTML5, PostgreSQL, JavaScript, REST APIs
- Diploma in Information Technology (Qualification Code:98806) | University of South Africa (UNISA) | 2025

- Systems Architecture & Operating Systems: Deep theoretical and practical mastery of advanced operating mechanics, memory allocation, process scheduling, CLI governance, and systems administration in Windows and Linux environments.
 - Network & Workstation Engineering: proficient in workstation hardware architecture, component diagnostic isolation, and core networking principles including TCP/IP, routing, switching, and structural subnet configuration.
 - Systems Engineering & Analysis: Trained in full Software Development Life Cycle (SDLC), Object-Oriented Analysis and Design (OOAD), and formal UML modelling (including Use Case, sequence, and Structural engineering diagrams)
 - Digital Logic & Computing Foundations: Strong foundation in Boolean algebra, binary/hexadecimal data representation, logic gate mechanics, and low-level computing logic.
 - Commercial Accounting & Fiscal Governance: Practical grounding in accounting principles, financial statement tracking, and resource allocation directly applied to optimizing IT capital expenditures, hardware procurement cycles, and vendor SLA management.
 - Business Management & IT Project Coordination: Trained in formal project lifecycle constraints, risk mitigation strategies, organizational structures, resource scheduling, and documentation governance.
 - Core Technical Track: Relational Database Design (SQL), Object-Oriented Programming (C#/ Java), Systems Architecture, and Network Security Configurations.
- Grade 12 – National Senior Certificate | South Africa | 2014
